

THE BRISTOL NEWS

J. C. FOWLER,
EDITOR AND PROPRIETOR.

TUESDAY, FEBRUARY 17, 1874.

For other local news see Third Page.

The Rain.—During the week an immense amount of rain fell in this locality. To the extent of the year's rainfall, the rainfall of the week has been a record. A surplus of rain has been a record of the year's rainfall. To the extent of the year's rainfall, the rainfall of the week has been a record.

Pure Notes.—The zeal and the discretion which characterized the efforts of very many of our citizens on the occasion of the fire of last Tuesday morning, cannot well be exaggerated. There are parties we desire to name, but the fear of omitting some of the most deserving forbids us.

Dr. Sales and wife, last about \$400, of which \$100 was in books and \$100 in military stock.

Mr. F. J. Conant lost very little save the interruption to his business.

Of Mr. Timberlake's stock not an iota was saved, and even his books and papers perished.

We hope our two town boards will select a number of competent fire-fighters, and that it will be made the duty of each to prevent the removal of any goods from the locality of any future conflagration. It should be known generally that goods cannot be removed at such times, except under guard.

Meats. I. B. Dunn & Co., have received a fresh lot of ladies and Misses shoes from the Winchester, Va., factory, and they seem to be of superior quality as well as finish.

Abingdon Presbytery. will meet at Green Spring in this County on tomorrow, the 22nd.

Good Idea.—Fine Cigars, fine Tobacco, and the finest wines and liquors to be had at Good Idea Saloon, by Capt. Jno. W. Davis, on Front Street, April 21st.

Our Kinderhook Road.—Mr. Boltes, our Road Commissioner, has been energetically devoting his time to the opening of the road from Bristol, via Buffalo Pond, to Kinderhook. With the exception of fending Mrs. Polly Smith's field, the route is now quite passable. If our citizens will subscribe a small sum, he can go ahead and complete the road, and we hope they will do so. The road will be a very important one to Bristol. We need Roads—Roads—Roads.

Track.—Prof. Winston has now in fine condition for transplanting a lot of Concord and Ives Grape Vines, and sells them at very low rates—about one fourth the usual price. It is not on late to transplant them, but it soon will be. Grapes are the surest of our fruit luxuries and perhaps the finest, and no one can have too many of them, nor have them too soon.

Sunday School Convention.

The semi-annual Session of Sullivan County Sunday School Convention, held in the Brick Church at Wytheville, on Wednesday 22d, April 1874, at 10 o'clock, A. M.

The following programme will be followed strictly, every exercise will be closed when the time expires, unless the time is extended by vote of the convention. Speakers appointed to open each discussion will be allowed 15 minutes, all others five minutes, and all speakers will be called to order on the expiration of their time.

First Session.—Wednesday morning, 11 to 11:30.—Devotional Exercises, 11 to 11:30. How can parents be induced to send their children to the Sunday School? Opened by Rev. Emory.

11:30 to 12.—Appointment of Committees, etc., Delegates names, &c.—Music.

Second Session.—Wednesday afternoon, 1 to 1:30. Reports for Schools; their condition, wants, encouragement and discouragements.

1:30 to 2:10.—Does the Sunday School work lessen the obligations on parents to instruct their children at home? Opened by Jno. W. Davis.

2:10 to 2:40.—Address—How to gain the heart for Christ. Rev. Mr. Caldwell.

2:40 to 3:20.—Should every Christian go to the Sabbath School who is able to do so? Rev. Mr. Wolford.

3:20 to 4.—Question Drawer.

Third Session.—Thursday morning, 9:30 to 10.—Children's prayer meeting.

10 to 10:30.—Address—The object of Sunday School teaching. Rev. Mr. Cowan.

10:30 to 10:45.—Remarks or prizes beneficial in Sunday School work? Rev. Mr. Sullivan.

10:45 to 11:20.—A School Experience meeting.

11:20 to 11:50.—Closing exercises. Resolutions. Next meeting, &c. W. H. H. GAINS, Sec'y.

We learn just before going to press that Dr. EDWARD D. KERMAN died at his residence in Lebanon, Russell county, on Wednesday morning. He was an eminent physician, had served the county in various capacities with fidelity, and was a useful and highly respected citizen.—Abingdon Virginian.

In an altercation between Dr. Cox and Mr. I. P. Jones in Abingdon, on Saturday evening last the latter received a severe cut in the arm from a knife in the hands of former. Dr. Cox lives at Friendship and Mr. Jones in Abingdon. We know nothing of the particulars of the case. Dr. C. was fined \$10 by the Mayor, and recognized by a Magistrate to appear before the next Grand Jury.—Abingdon Virginian.

The small square silk handkerchief and black lace scarf have superseded neckties to a great extent, and have reduced the importance of even the ruff. The former is patronized principally by young ladies, and is laid about the neck in a loose and careless fashion, very much like the neck gear of a "commercial" traveller. The favorite neckerchiefs are of twisted white silk, with a border over an inch in width of violet or blue.—From Demorest's Monthly for May.

Small basques, and sleeveless tunics do very well for girls, and young married women, but matrons require garments more sober and stately, and for these the dress of the day, the polonaise, and the redingote, the mantilla basque is especially provided. For the spring and summer season various modifications of the mantilla, scarf, and scarf, mantles or mantles will take the place of the jacket, and other garments. Some of these are loose, others held in at the waist, some have sleeves, others are sleeveless. Some will be outlined with rich beaded gimp upon lace, others will be trimmed with the fashionable beaded lace upon silk. Pretty lace jackets appear in great variety, with straight striped bodies; some trimmed with ribbons, others literally sparkling with jet. Straight jackets of ecrú lace insertion are also charming, and quite new, they are sometimes beaded with white jet, and generally trimmed with very pale blue ribbon.—From Demorest's Monthly for May.

We regret that the pointed veils, so easily arranged and so becoming have been superseded by the straight mask veils drawn straight across the face, and neither pleasant to wear nor convenient to raise. There are other styles more elaborate—the scarf veil, for example, which has long been brought forward, and crossed upon the bosom with a low ribbon, and another, which terminates in one long tassel which is fastened with a bow to the shoulder; but these are fanciful, not practical; and as the mass of women, as well as mankind, are satisfied to take the easiest, the mask veil must be accepted with all its shortcomings.

In gauze veils for traveling wear, the gray veil is still the favorite color; but the blue and white veils have given place to the lighter tissues, which are much more agreeable wear.—From Demorest's Monthly for May.

English Housekeeping.

A great amount of labor goes in an English house to the duty and disagreeable task of preparing the fires, which squander so rapidly our remaining stores of coal, and which, in a small house, where saving of labor has become a pressing necessity, the trouble is minimized by a simple arrangement. A single furnace is lighted and the rooms are warmed by hot air, which can be admitted or excluded at pleasure. In England we cling to the belief that our own plan, which means economy, is the best. It is a plan which, by playing about our backs as we sit at our fires, and allows us to pass through all climates between our kitchens and our garrets, is healthier and more comfortable. However that may be, it is clearly more laborious. A similar principle might be carried out in almost every department of domestic life.—Cornhill Magazine.

Of planting trees, Johnson has observed: "There is a frightful interval between the time when a tree is planted and the time when it is useful. It is a tree which calculates the growth of trees has the remuneration of the shortness of life driven hard upon him."

The Bald Mountain Hoax Exposed.

A communication in the Wilmington (N. C.) Journal says Colonel Ames is using a vast amount of nitroglycerine in blasting out nature's deposits of granite, lime, and sandstone in Boggen's cut, keeping a large force at work night and day. This is done by charging them all at a time with a patent fuse, and blowing them up by means of dynamite. Three pounds of dynamite are used for every cubic foot of rock. The fuse is a single line, and the fuse is a single line, and the fuse is a single line.

It is a great art to make a good kite. It should be shaped evenly so as to balance well. The sticks should be just strong enough for the size of the kite without being too heavy. The paper should be of a proper strength and lightness. The four cords that start from the four corners should be gathered into one and attached at just the right point to the kite, so as to secure its proper angle against the wind. And, above all (or rather, below all), the tail should be long enough and heavy enough to balance the kite, and to keep it from being blown away like a thing of life. A tail too heavy or too light for its length, or too short for its weight, whichever you please, will ruin the kite. The kite is a thing of life, and it is a thing of life, and it is a thing of life.

BRISTOL ENTERPRISES.

Manufactures and special Trade.

What is Made and What is Sold.

It is our design to keep before the readers of the Bristol News these exclusive enterprises of our town, which are worthy of the confidence and attention of the public.

The Foundry and Machine Shop of Messrs. Dixon, Smith & Co., may be found on Fourth St., near the Tennessee Depot. They make a very fine article of Cast-iron Hollow ware.

Mill Gearing, Tins, Hammers, Coal Grates for dwellings, a large variety of Pumps, which are stocked in a manner which is not equaled at any other establishment within our knowledge, and a large number of other articles too numerous to mention. The business is superintended by Mr. Dixon, originally from eastern Virginia, but more recently from the State of Georgia, and is one of the most competent and skillful workmen we ever saw. Mr. Nelson gives his attention to the moulding department, and also to the stocking of pumps. A twenty-horse power engine is employed. No piece of work is allowed to leave the establishment unless it is tested and believed to be of good quality.

The Sash, Blind and Door Factory of Messrs. Mattox, Lee & Ferguson, on Lee Street and has combined with it the

Furniture Business.

which is under the immediate supervision of Mr. G. H. Mattox, who has been successful in the business for many years, and is well known in the country. Quite a large business is done for distant points, and a very superior article of furniture is made, the prices of which are low. The styles are the very newest and best. This branch of the business has been successfully introduced to the public as West to Morris town.

The Sash and Door department is superintended by Mr. John Lee, recently from Culpeper, Va. He has a large stock of sashes, and has already gotten the business upon such a basis that its success has been beyond his own expectation. Sash, Doors, Frames and Floorings are turned out with great rapidity, and in large quantities and are shipped daily to points in S. W. Va., and East Tennessee. Orders are filled in almost an incredible short time, and the work is of excellent quality. A thirty horse power engine and about one dozen hands are employed.

Tobacco Factory.

Maj. Reynolds will soon have his large Tobacco Factory under way. He is a first class tobacco man, business man, and a very useful member of our manufacturing community. His house is 4333 and is three stories high.

The Bristol Mills.

are now in the hands of Mr. Waddie of the large foreign house of Geo. E. Ewing & Co., and has just been placed in the finest position of the business. The mills are now in the hands of Geo. E. Ewing & Co., and has just been placed in the finest position of the business. The mills are now in the hands of Geo. E. Ewing & Co., and has just been placed in the finest position of the business.

All grain is passed through the Fan and when necessary through the Smut-ter, and the Flour is strictly up to brand. The "White Horse" brand is delivered, and the business conducted on a cash basis. A forty horse power Turbine wheel is used.

The Hardware Business is conducted by Mr. S. R. Ferguson, formerly of Portsmouth, Va., and has been recently relocated to the business. His stock is very complete, well assorted and sold at prices which we regard as low.

Jewelry.

Mr. Doriot has a stock of Watches, and Fine Jewelry which is not equalled between Richmond and Nashville. He is a first class Jeweler, and has had twenty years experience.

Jewelry.

Mr. A. Picken, late of the city of London, has had a long experience as a workman, and keeps on hand a complete and excellent stock of the finest Watches, Clocks and Jewelry of all kinds, to be had in any market.

Guns, Pistols, &c.

Mr. S. O. Fisher, formerly of Lynchburg, Va., has a fine stock of Guns, Pistols, Sporting Tackle, Cans, &c. He is a practical gun and lock smith.

Merchant Tailor.

Mr. W. G. Stratton keeps on hand the only lot of fine cloths and cassimeres in our town and is doing quite a good business. He has had long experience and is giving fine satisfaction.

Millinery and Gaiter Making.

Mrs. Bettie Galloway is entitled to preeminence in the department of making hats and gaiters. Her business has been enlarged and all of her stock is carefully purchased in the eastern cities by herself in person. Her goods are of the best quality, and her success is no longer a question.

Mrs. Seales has a nice stock of Millinery Goods in the room once occupied by the Bristol News, in Kane's Block. She is a lady of taste and well worthy of the public patronage.

Mrs. Frost and Mrs. Dowler have a good stock of Millinery Goods, in Bosang's Block, Caldwell's old stand, and have qualifications for and experience in the business. They are perfectly reliable and give fine satisfaction.

Blank Deeds.

We have printed a limited number of Deeds, which are exactly in conformity to the code, with acknowledgments printed for both the husband and wife. They are printed on fine tinted Bond Paper, and will bear folding and handling without damage. Parties wishing a handsome statutory form for deed will apply at the office of the Bristol News.

Furniture.

H. A. Bickley's Furniture Factory is at the corner of Depot and Second Sts., Va. Hill. Beds, Bureaus, Cases, Safes, &c., made to order. Power is used for running machinery. A supply of metal and other materials kept on hand and supplied to order. Mr. Bickley has a large experience in the trade, and is well known as a reliable and excellent workman.

Blank Deeds.

We have printed a limited number of Deeds, which are exactly in conformity to the code, with acknowledgments printed for both the husband and wife. They are printed on fine tinted Bond Paper, and will bear folding and handling without damage. Parties wishing a handsome statutory form for deed will apply at the office of the Bristol News.

The Ware, Stores, &c.

Keller & Brewer have a large stock of Groceries and Dry Goods, and keep on hand a large stock of material. They run eight teams constantly into the country, and furnish roofing, spouting and gutters on short notice. Their work is of the best quality.

Geo. W. Hammit

on Main Street, keeps on hand Groceries and Hardware and manufactures ware for general stock, and to order. Furnishes roofing, spouting and gutters. He is an experienced and reliable workman.

Boots and Shoes.

G. W. Frost & Co., have a large Shoe Factory at corner of Main and 6th streets. They are equipped with improved machinery, and furnish a large variety of shoes. Their work is equal in appearance and quality to Northern work. They also keep on hand a fine stock of northern shoes for gents, ladies and children. There are none employed in the establishment, fifteen hands, and it is in contemplation to increase the force to thirty hands. The house is certainly superior to any other shoe establishment which has been in the country.

Pictures.

J. C. & W. M. Burrow at 200 Main Street, have a large collection of pictures, and do the largest business of the kind in the South. They advertise in 500 papers, and publish a paper of their own.

Job Printing is done at the office of the Bristol News, in all styles, from the plainest ledger, to the most ornate colored and shaded title, cards, bill heads, letter heads, circulars, &c. The motto of the office is "work done in city style, at city prices," and with this inscribed on its banner, the News has all of the Job Work it can do, and is getting ready to do more. The demand for Job Work is becoming greater, and we mean to meet it.

Toys and Confections are furnished in great variety by Messrs. E. Kuhner & Son, who manufacture an excellent article of pure candy, and keep their counter supplied with a nice article of candy. They also furnish out for wedding parties.

ENTERPRISES not advertised in the News, can be inserted in this column at a fair price in money.
